Contents

1 *Overview* **Toughness in metal matrix composites**
C. M. Friend

8 **Characterisation of critical nucleus/matrix interface: application to Cu-Co alloys and microalloyed austenite**
W. J. Liu and J. J. Jonas

13 **Effects of precipitates on ferrite grain size in 0·15%C steels**
M. M. A. Bepari

20 **Influence of prior microstructure on normalising response of C–Mn–Al–Nb steels**
R. C. Cochrane, B. Mintz. and J. L. Ward

29 **Niobium carbonitride precipitation in low carbon high manganese steel after hot rolling**
H.-J. Kestenbach, J. A. Rodrigues, and J. R. Dermonde

36 **Microstructure and mechanical properties of duplex martensitic–austenitic Fe–Ni–Ti steels**
V. G. Gorbach, J. Jeleńkowski, and J. Filipiuk

40 **Examination of fatigue and creep–fatigue crack growth behaviour of aged type 347 stainless steel weld metal at 650°C**
D. N. Gladwin, D. A. Miller, and R. H. Priest

52 **Effects of silicon additions on aging behaviour of Al–1·52Cu–0·75Mg alloy**
A. K. Gupta, M. C. Chaturvedi, and A. K. Jena

56 **Microstructure and properties of extruded Al–6Mg–3Cr alloy prepared from rapidly solidified powder**
E. K. Ioannidis, G. J. Marshall, and T. Sheppard

65 **Effect of surface treatment on fatigue properties of Al–Li–Cu–Mg–Zr and Al–Zn–Mg–Cu–Zr plate**
P. J. Gregson, J. Newman, and A. Gray

71 **Wear of alumina fibre–aluminium metal matrix composites by two-body abrasion**
A. G. Wang and I. M. Hutchings

77 **Application of lasers to cutting copper and copper alloys**
D. N. Pocklington

88 **Evaluation of nitrogen content in welded 304 stainless steel using Auger electron spectroscopy – possible improvement of weld decay by nitrogen**
K. Ishizaki, P. A. Fernandez, and M. L. Salas

93 *Short Communication* **Orientation relationships between adjacent plates of acicular ferrite in steel weld deposits**
J. R. Yang and H. K. D. H. Bhadeshia

105 *Overview* **Mechanical property test procedures for metal matrix composites**
B. Roebuck, T. A. E. Gorley, and L. N. McCartney

118 **Effects of interfacial energies on heterogeneous nucleation**
L. F. Mondolfo

123 **Metastable phase formation in rapidly solidified Al–Mo alloys**
E. A. Logan, J. N. Pratt, and M. H. Loretto

131 **Theoretical analysis of changes in cementite composition during tempering of bainite**
H. K. D. H. Bhadeshia

138 **Role of carbides in tempered martensite embrittlement**
C. L. Briant

148 **Segregation of phosphorus in austenite in Fe–P and Fe–10Mn–P alloys**
M. Paju and H. J. Grabke

155 **Growth of grain boundary carbides in C–Mn steels**
B. Mintz and P. Campbell

162 **Microstructures of some high tensile brasses**
Y. S. Sun, G. W. Lorimer, and N. Ridley

172 **Age hardening and creep ductility in Cr–Ni–Ti, Fe alloys**
F. E. Asbury

180 **Structure and hardness of Ni–Mo–Cr–Si wear and corrosion resistant alloys**
S. E. Mason and R. D. Rawlings

B. Mintz and P. Campbell

162 **Microstructures of some high tensile brasses**
Y. S. Sun, G. W. Lorimer, and N. Ridley

172 **Age hardening and creep ductility in Cr–Ni–Ti, Fe alloys**
F. E. Asbury

180 **Structure and hardness of Ni–Mo–Cr–Si wear and corrosion resistant alloys**
S. E. Mason and R. D. Rawlings

186 **Texture and formability in fcc metals and alloys**
T. Öztürk and G. J. Davies

194 **Evolution of structure in roll gap when rolling aluminium alloys**
N. Raghunathan and T. Sheppard

209 *Overview* **Elastomer composites for engineering applications: spontaneous and other forms of bonding between components**
R. P. Campion

222 **True grain size distribution of WC–Co alloy**
J. Wasén and R. Warren

227 **Strengthening in pearlite formed from thermomechanically processed austenite in vanadium steels and implications for toughness**
F. B. Pickering and B. Garbarz

238 **Development of textures during rapid intercritical annealing of deep drawing steels**
F. Emren, U. v. Schlippenbach, and K. Lücke

249 **Hot extrusion of AA 7178 reinforced with alumina short fibre**
K. Suganuma, T. Fujita, K. Niihara, T. Okamoto, M. Koizumi, and N. Suzuki

255 **Effect of soft additives (Pb/Bi) on machinability of low carbon resulphurised free machining steels**
H. Yaguchi

268 **Modification of cast structures in Al–Mg alloys by thermal treatments**
T. Sheppard and N. Raghunathan

281 **Joining of high strength oriented polypropylene using electromagnetic induction bonding and ultrasonic welding**
T. Zach, J. Lew, T. H. North, and R. T. Woodhams

288 **Nature of fluted fracture observed in welds in titanium plate**
R. C. C. Nixon and D. N. Hawkins

293 **Prediction of weld geometries for CO_2 butt welded joints**
T. Shinoda and I. Masumoto

299 *Short Communication* **Measurement of activation energy values for sintering of active urania powder compacts**
P. Das and R. Chowdhury

309 *Overview* **Thermotropic liquid crystal polymers for engineering applications**
A. A. Collyer

323 **Carbide stabilities in a Cr–Mo–V bolting steel**
M. J. Collins

328 **Cellular precipitation in a nitrogen alloyed stainless steel**
D. B. Rayaprolu and A. Hendry

333 **Some effects of heat treatment on grain boundary chemistry and precipitation in type 316 steel**
A. W. James and C. M. Shepherd

346 **Kinetics of precipitation in 17–4 PH stainless steel**
U. K. Viswanathan, P. K. K. Nayar, and R. Krishnan

350 **Effect of laser heating on substructure of 0·4%C steel**
S. Mandziej, M. C. Seegers, and J. Godijk

356 **Design and development of scanning reference electrode technique for investigation of pitting corrosion in FV 448 gas turbine disc steel**
S. J. Bates, S. R. Gosden, and D. A. Sargeant

362 **Computer simulation of grain growth and macrostructure development during solidification**
S. G. R. Brown and J. A. Spittle

369 **Warm pressing of cobalt base amorphous alloy powders**
H. Esaki, K. Ameyama, and M. Tokizane

377 **Bond criterion in cold pressure welding of aluminium**
T. Tabata, S. Masaki, and K. Azekura

382 **Characterisation and wear performance of plasma sprayed WC–Co coatings**
V. Ramnath and N. Jayaraman

389 **Determination of heat transfer coefficient of air mist sprays**
B. Prinz and M. Bamberger

394 *Technical note* **Initial damage and its evolution with stretching of experimental microalloyed mild steel sheet**
J. Fernández, J. Riba, and J. A. Pero-Sanz

398 *Short communication* **Growth rate data on bainite in alloy steels**
A. Ali and H. K. D. H. Bhadeshia

403 *Short communication* **Effect of various oxide additives on dielectric behaviour of hot pressed AlN ceramic**
M. Zulfequar, D. B. Singh, and A. Kumar

413 *Overview* **Defect types and non-destructive testing techniques for composites and bonded joints**
P. Cawley and R. D. Adams

427 **Thermodynamic properties of Cu–Ni alloys: measurements and assessment**
S. Srikanth and K. T. Jacob

435 **Superplasticity in Al–33Cu eutectic alloy in as extruded condition**
A. H. Chokshi and T. G. Langdon

443 **Mechanical theory of strain rate sensitivity index *m* and new method of measurement using constant load**
Song Yuquan and Lian Shujun

450 **Aluminium nitride precipitation in multiple microalloyed pipeline steels**
C. O. I. Emenike and J. C. Billington

457 **Influence of tempering on impact behaviour of normalised steels**
J. Kolahi-Aval and B. Mintz

465 **Dependence of strength–ductility characteristics on thermal history in low carbon 5 wt-%Mn steels**
T. Furukawa

471 **Modification of Al–7Si–0·3Mg alloy by sodium and strontium in presence of antimony**
Weixing Wang and J. E. Gruzleski

477 **Corrosion fatigue of SAE 51100 steel in 3%NaCl solution**
Dong Nyung Lee and Sung Keun Lee

487 **Microcomputer controlled scanning reference electrode technique apparatus developed to study pitting corrosion of gas turbine disc materials**
D. A. Sargeant, J. G. C. Hainse, and S. Bates

492 **Failure mechanisms in rephosphorised sheet steel spotwelds**
L. G. Moore, D. Jaffrey, and H. W. Kerr

499 *Short communication* **Creep of Cr_2O_3 and yttrium doped Cr_2O_3**
A. Dominguez-Rodriguez, A. R. De Arellano-López, K. C. Goretta, W. E. King, J.-H. Park, and J. L. Routbort

509 *Overview* **Interaction of design, manufacturing method, and material selection**
J. A. Charles

517 *Overview* **Materials selection conceptual design**
M. F. Ashby

526 **Determination of cadmium rich corner of Cd–Cu–Zn, Cd–Cu–Mg, and Cd–Cu–Pb phase diagrams**
M. A. Ruggiero and J. W. Rutter

533 **Structure and properties of Al–Li–Cu–Mg–Zr alloy AA 2091 in sheet form**
A. F. Smith

542 **Microstructural development during annealing of hot rolled Al–Mg alloys**
N. Raghunathan and T. Sheppard

548 **Micromechanisms governing fatigue behaviour of lithium containing aluminium alloys**
T. S. Srivatsan and E. J. Coyne, Jr

557 **Width of adiabatic shear bands formed under combined stresses**
B. Dodd and Yilong Bai

560 **Characterisation of 20Cr–25Ni–Nb stabilised stainless steel using secondary ion mass spectroscopy**
G. C. Allen, R. P. Sparry, and R. K. Wild

566 **Formation of precipitates in multiple microalloyed pipeline steels**
C. O. I. Emenike and J. C. Billington

575 **HAZ fracture toughness of titanium containing steels**
T. W. Lau, G. R. Wang, and T. H. North

584 **Crack propagation of secondary hardened alloy steels in gaseous hydrogen atmosphere**
M. Nakamura and E.-i. Furubayashi

590 **Formation of hard microcrystalline layers on stainless steel by laser alloying**
C. Rieker, D. G. Morris, and J. Steffen

595 **Heat transfer and ingot temperature distribution analysis in semicontinuous copper casting process**
A. Del Puglia, D. Quilghini, B. Tesi, G. Zonfrillo, and P. Lombardi

605 **Formability and electrochemical characteristics of aluminium dry powder coatings**
I. A. Shibli and D. E. Davies

609 ***Short Communication*** **Preferential nucleation in undercooled liquid aluminium alloys II**
L.-M. Pan, N. Saunders, and P. Tsakiropoulos

613 ***Short Communication*** **Friction effect in low load hardness testing of iron**
M. Atkinson and H. Shi

621 **Adhesion in dentistry: Part 1 Critical overview**
R. D. Bagnall

627 **Microstructural assessment of interaction zone in titanium aluminide/TiC metal matrix composite**
D. G. Konitzer and M. H. Loretto

632 **Constitution of Ti–Al–Ru system**
A. Khataee, H. M. Flower, and D. R. F. West

645 **Effect of strontium and phosphorus on solid/liquid interface of Al–Si eutectic**
J. F. Major and J. W. Rutter

657 **Classification of degenerate graphite and its formation processes in heavy section ductile iron**
Zhu Zhang, H. M. Flower, and Yinyi Niu

665 **Investigation using neutron diffraction of changes of deformation texture in low carbon cold rolled steel during recrystallisation annealing**
I. Iordanova, K. S. Forcey, D. K. Ross, J. Mayers, and A. C. Hannon

674 **Transformation processes and products for C–Mn steels during continuous cooling**
Jye-Long Lee, Shyi-Chin Wang, and Gwo-Hwa Cheng

682 **Influence of calcium on hot ductility of steels**
B. Mintz, Z. Mohamed, and R. Abu-shosha

689 **Fatigue crack propagation in Al–Sn bearing alloys**
A. K. Busby and J. W. Martin

699 **Statistical scatter and variability of creep property estimates in θ projection method**
R. W. Evans

708 **Silicate anion analysis in Portland cement pastes**
A. M. Dunster, J. R. Parsonage, and E. A. Vidgeon

714 **Microstructural studies of alkali–silica reaction products**
X. Zhang and G. W. Groves

718 **Evaluation of apparatus for assessing effect of forced convection on quenching characteristics**
H. M. Tensi and P. Stitzelberger-Jakob

725 ***Short Communication*** **Ceramic–metal composites produced by laser metal surface treatment**
J. H. Abboud and D. R. F. West

Proceedings of conference 'Alloy design and oxidation'

733 **Editorial**

734 **Influence of alloy additions on oxidation**
F. H. Stott

741 **Healing layer formation in Fe–Cr–Si ferritic steel**
J. Robertson and M. I. Manning

754 **Role of reactive elements in alloy protection**
D. P. Moon

765 **Design of sulphidation resistant alloys**
K. N. Strafford and P. K. Datta

780 **Coatings and surface treatments for high temperature oxidation resistance**
S. R. J. Saunders and J. R. Nicholls

799 **Optimising oxidation resistance of MCrAl coating systems using vapour phase alloy design**
J. R. Nicholls, P. Hancock, and L. H. Al Yasiri

806 **Surface modification using lasers and ion beams**
A. Galerie, M. Pons, and M. Caillet

813 **Coextrusion cladding for oxidation protection**
E. P. Latham, D. B. Meadowcroft, and L. Pinder

816 *Poster Paper* **Effect of tantalum additions on oxidation of overlay coated superalloys**
P. Fox and G. J. Tatlock

828 *Poster Paper* **Dependence of oxidation behaviour on silicon content of 20%Cr austenitic steels**
R. C. Lobb, J. A. Sasse, and H. E. Evans

835 *Poster Paper* **Silicon coating treatment to improve high temperature corrosion resistance of 9%Cr steels**
M. P. Hill

841 *Poster Paper* **Oxidation protection of alloy IN 738 LC plasma assisted vapour deposited silica coating**
M. J. Bennett, A. T. Tuson, C. F. Knights, and C. F. Ayres

853 *Poster Paper* **Protection of low alloy steel against thermal oxidation or sulphidation by superficial pack or laser aluminisation**
A. Skalli, A. Galerie, and M. Caillet

---

865 **Vickers indentation fracture toughness test**
Part 1 Review of literature and formulation of standardised indentation toughness equations
C. B. Ponton and R. D. Rawlings

873 **Solid state phase transformations in Ti–Al–Ru system**
A. Khataee, H. M. Flower, and D. R. F. West

882 **Mechanical properties of Al–Li alloys**
Part 1 Fracture toughness and microstructure
K. T. Venkateswara Rao and R. O. Ritchie

896 **Mechanical properties of Al–Li alloys**
Part 2 Fatigue crack propagation
K. T. Venkateswara Rao and R. O. Ritchie

908 **Serrated yielding in Nb–V dual phase steel**
V. Radmilović, Dj. Drobnjak, and M. Jovanović

913 **Statistical model of cleavage fracture in granular bainite in simulated weld heat affected zone**
X. X. Xu, Q. G. Cai, Y. Su, C. X. Hou, and W. D. Ma

918 **Modifying high Cr–Mn cast iron with boron and rare earth–Si alloy**
Han Fusheng and Wang Chaochang

925 **New nickel base investment casting alloys IN 6201 and IN 6203**
S. W. K. Shaw and M. J. Fleetwood

934 **Cold roll bonding of bimetallic sheets and strips**
D. Pan, K. Gao, and J. Yu

940 **Deformation behaviour of different types of inclusion during chip formation in turning of quenched and tempered steels**
A. Nordgren and A. Melander

952 *Short Communication* **γ' precipitation in some model nickel based superalloys**
S. Sadiq and D. R. F. West

961 **Vickers indentation fracture toughness test**
Part 2 Application and critical evaluation of standardised indentation toughness equations
C. B. Ponton and R. D. Rawlings

977 **Thermodynamic estimation of liquidus, solidus, Ae_3 temperatures, and phase compositions for low alloy multicomponent steels**
A. A. B. Sugden and H. K. D. H. Bhadeshia

985 **Interfacial segregation of magnesium in nickel base superalloy: carbide morphology and properties**
H. L. Ge, W. V. Youdelis, G. L. Chen, and Q. Zhu

991 **Effect of beryllium and calcium on aging behaviour of Al–0·75Mg–0·5Si alloy**
T. Xiao and W. V. Youdelis

995 **Effect of grain boundary characteristics on mechanical behaviour of quenched aluminium**
M. Bacia, J. Kwiecinski, and J. W. Wyrzykowski

999 **Effect of cyclic deformation on strain enhanced grain growth during superplastic flow**
X. Wu, V. D. Campenni, C. H. Cáceres, and D. S. Wilkinson

1005 **Creep transients after stress changes**
B. Burton

1013 **Temperature dependence of impact toughness in Al–Li–Cu–Mg–Zr alloys**
T. Kobayashi, M. Niinomi, and K. Degawa

1021 **Lateral spread during slab rolling**
N. Raghunathan and T. Sheppard

1027 **Production of rapidly solidified magnesium powders by gas atomisation**
A. Ünal

1034 **Effect of weld thermal cycle on behaviour of Ti–Nb carbonitrides in HSLA steel**
J. T. Bowker, J. Ng-Yelim, and T. F. Malis

1037 **Dual phase vitreous enamels**
Part 1 Preparation, application, and properties
R. F. Price, N. Fletcher, and M. J. Stowell

1044 **Dual phase vitreous enamels**
Part 2 Adhesion of vitreous enamels on steel
C. Sherhod and M. J. Stowell

1057 **Formation of acicular ferrite at oxide particles in steels**
F. J. Barbaro, P. Krauklis, and K. E. Easterling

1069 **Microstructure and properties of sintered Cu–25Cr alloy**
S. Spaić, M. Komac, and A. Fetahagić

1074 **Microstructure and mechanical properties of milled and continuously cast lead sheet**
Part 1 Microstructures
S. Whillock, J. A. Charles, and G. C. Smith

1084 **Improved mechanical properties of ultrahigh strength 0·4C–Cr–Mo–Ni steel through modification of sulphide inclusion shape and microstructural control**
Y. Tomita

1090 **Effects of aging at 700 °C on ductile fracture of AISI 316 stainless steel**
B. A. Senior, R. Havel, and B. K. Neale

1095 **Influence of phosphorus on weld heat affected zone toughness in niobium microalloyed steels**
R. G. Faulkner

1102 **Intergranular fracture of Al–Li–Cu–Mg alloy resulting from non-equilibrium eutectic melting during solution treatment**
P. Bourgasser, J. A. Wert, and E. A. Starke, Jr

1109 **Control of cavitation during superplastic forming of high strength aluminium alloys**
A. Varloteaux, J. J. Blandin, and M. Suéry

1118 **Control of microstructure and earing behaviour in aluminium alloy AA 3004 hot bands**
W. B. Hutchinson, A. Oscarsson, and Å. Karlsson

1128 **Effect of chromium carbides on electrical resistivity of nickel based alloys by low temperature aging**
H. Kajimura and K. Yamanaka

1135 **Magnetostriction of duplex stainless steels**
H. L. M. Bakker

1140 **High temperature oxidation of commercial austenitic stainless steels**
F. H. Stott and F. I. Wei

1148 **Permeability of dendrite network of cubic alloys**
C. Y. Liu, K. Murakami, and T. Okamoto

1153 **Surface damage in electrodischarge machining**
P. F. Thomson

1158 ***Short Communication*** **Effect of pressure on electrical resistivity of $Mg_{70}Zn_{30}$ metallic glass**
Y. M. Yaman

1165 **Strengths of grain boundaries in pure metals**
A. Cottrell

1168 **Stability of trapped lattice dislocations on interphase boundaries in duplex stainless steel**
W. A. Świątnicki, E. Jezierska, and M. W. Grabski

1172 **Phase separation reactions in Ti–50V alloys**
Wei Fuming and H. M. Flower

1178 **Rate equation for recovery, precipitation, transient creep, and sintering**
H. Blank

1186 **Effect of multipeak dynamic recrystallisation of structure of deformed and annealed copper**
L. Blaz and A. Korbel

1191 **Influence of dynamic recrystallisation on hot ductility of aluminium killed mild steel**
L. E. Cepeda, J. M. Rodriguez-Ibabe, J. J. Urcola, and M. Fuentes

1200 **Void nucleation and growth in dual phase steel wires**
L. Šidjanin and S. Miyasato

1207 **Effect of interfacial segregation of magnesium on high carbon (18%Cr) cast steel**
H. L. Ge, W. V. Youdelis, and G. L. Chen

1212 **Influence of manganese and sulphur on hot ductility of steels heated directly to temperature**
B. Mintz and Z. Mohamed

1220 **Nickel based hardfacing alloys for high temperature applications**
S. Atamert and H. K. D. H. Bhadeshia

1229 **Physicomechanical properties of nickel electrodeposited from nickel acetate–amide baths**
H. K. Srivastava

1236 ***Short Communication*** **Electrochemical methods for studying hydrogen diffusivity, permeability, and solubility in AISI 420 and AISI 430 stainless steels**
C. H. Tseng, W. Y. Wei, and J. K. Wu

Book reviews

pages 98, 202, 301, 407, 503, 615, 729, 860, 957, 1052, 1160, 1240

Corrigenda

pages 503, 957
